OUR OVENS/
CREATING NEW WAYS TO COOK

True fan cooking

Your roasts and baking will always achieve mouth-watering results with true fan cooking. Our true fan cooking system gently circulates hot air through the oven cavity, allowing you to cook sweet and savoury at the same time with no transfer of flavour and taste. As the oven heats up faster, lower temperatures and shorter cooking times are used to achieve those delicious results.

ThermiC° hot air cooking

Our new exclusive ThermiC° hot air cooking technology in our MaxiKlasse™ oven range ensures precise heat circulation and exact temperature control. The result is perfect cooking in every corner. On any shelf. In any position.

Defrost

Defrost your frozen food gently in half the usual time. Air is gently circulated around the oven cavity quickly, defrosting your food hygienically.

Conventional

No need to alter your cooking style for your favourite traditional recipe. Top and bottom elements heat the oven providing traditional cooking on one shelf position, which is ideal for baking breads or fruitcakes.

Turbo grilling

This clever function gives an authentic spit roast effect without the mess. Heat from the top elements is circulated by the fan, sealing and crisping the food whether it's the joint or the roast potatoes.

Pizza setting

Great baking results with today's modern cookware, ensuring bases are properly cooked. Designed to ensure pastry bases, quiches and pizzas are cooked to your taste.

Bottom heat

Oven is heated by the bottom element only. Foods are gently reheated, ideal for pies and pastries as it keeps the pastry crisp. This function is also ideal for plate warming.

Top heat

Oven is heated by top element only. Ideal for the Shepherd's Pie, or lasagne that just require gentle browning.

Grilling

Fully controllable powerful grill, ideal for family sized portions of food.

Economy grilling

Fully controllable economy grill, suitable for smaller quantities.

Slow cook

Come home to a slow cooked roast or casserole. Two slow cook options, dependent on quantity of food being cooked. Food is initially sealed and then cooked at the low temperature to tenderise the ingredients.

Keep warm

This option maintains a temperature of 80°C, an ideal temperature for keeping food warm until ready to serve, without drying the food.

Frozen foods

Cook straight from frozen. All round intense heat ensures your frozen food is correctly defrosted and cooked at the same time.

Eco roasting

Economical setting for roasting large joints or poultry. Simply select the appropriate cooking time depending on the weight of the food and the oven automatically switches off once the cooking is complete.

Fast heat up

No waiting for your oven to reach full heat, eliminating the need for preheating, great for those quick convenience meals.

Moist fan baking

Allows you to create your light and fluffy fatless sponges and baked soufflés to perfection. Moisture is retained within the oven thus achieving light fluffy results whilst using the oven in a more economical way.

Additional options
(selected models)

Regenerate
Steam is used to gently heat food up and keep it warm.

Dough proving
Creates the perfect environment to assist bread baking by proving your yeast mixture correctly.

Bread baking
Optimum temperature and environment for baking yeast mixtures. Using radiant heat and steam to bake a variety of loaves to your taste.

Preserving and drying
Suitable for drying foods like herbs, mushrooms and chillies.

OVENS/

MAXIKLASSE™ SINGLE OVENS

More room for perfect results

The AEG MaxiKlasse™ oven has extra large capacity - our largest standard single oven, with up to 5 shelf positions. With greater room and our ThermiC° Hot Air cooking system more hot air is circulated to every corner of the oven at a precise temperature for perfectly even cooking, wherever the food is placed.

Extra large capacity

Our large 74L MaxiKlasse™ oven has more usable space which allows you to cook on all 5 levels at the same time, which means you can bake 150 cookies at the same time.

ThermiC° hot air cooking

Our new exclusive ThermiC° hot air cooking technology in our MaxiKlasse™ oven range ensures precise heat circulation and exact temperature control. The result is perfect cooking in every corner. On any shelf. In any position.

PerfektEntry for total flexibility

Besides carefully choosing the cooking function and temperature, where you place the food in the oven is also important for perfect baking and cooking. All of our MaxiKlasse™ ovens feature the specially designed OptiFlex™ shelf runners which are shaped to make it easier to select and adjust the cooking level you require.

Core temperature sensor

Our MaxiKlasse™ ovens also feature the core temperature sensor, an additional tool to help you reach perfection by measuring the precise cooking temperature deep inside the food. This takes the guesswork out of cooking and ensures your food is never under or over cooked.

Proven in over 1000 tests

Our MaxiKlasse™ oven has been tested on cooking a wide range of different foods and always delivered strong performance results.

Other MaxiKlasse™ oven features: SoftMotion™ soft close door

Our newly designed oven door will close itself softly and quietly, when it reaches a certain angle - in a smooth, elegant movement. More evidence of premium design.

MaxiView and FloodLight™

The new inclined FloodLight™ is specially positioned at the front of the oven and angled directly onto your food. Combined with our new larger MaxiView viewing window, enabling you to see at a glance and check the progress of your mouth watering results.

AntiStick oven shelves

Some of our MaxiKlasse™ ovens come with AntiStick oven shelves which have a special coating to stop grease from sticking. These are really easy to clean with just water.

Low temperature door for safe handling

Our MaxiKlasse™ oven has an IsoFront® door with a special heat reflective coating. This technology leaves the outside of the oven door cooler to the touch.

Efficient energy consumption

Our MaxiKlasse™ oven is extremely energy efficient achieving an A-20% for energy efficiency - that's 20% better than energy efficiency class A.

Anti fingerprint stainless steel

Our MaxiKlasse™ oven has an anti fingerprint coating taking the elegance and lustre of stainless steel one stage further, eliminating unsightly fingerprints ensuring your oven looks effortlessly clean.

All AEG ovens and microwaves, feature this stylish finish.

Design Awards

Gold Award Winner,
Design Awards 2011

The Gold award is the highest classification for products in the Product Innovation Award categories at the Design Awards 2011, organised by Designer magazine.

Products achieving the Gold standard have been judged to be real innovators within their particular product category, delivering something genuinely new to the market.

13 of our products have been awarded Gold in the kitchen category at this year's awards.

OVENS/
PYROLUXE® PLUS SINGLE OVENS

Pyroluxe® Plus cleans thoroughly enough to impress the professionals. The self cleaning function heats the oven up to 500°C. At this temperature, all food residue is turned to ash, with no unpleasant odours or chemical cleaning agents. Simply wipe out the ash with a damp cloth.

Efficient energy consumption

Pyroluxe® Plus appliances are not only extremely efficient when cooking but also when self cleaning. Energy consumption is up to 20%* lower than the requirements for efficiency Class A.

Pyroluxe® Plus cleaning cycles

Some models have more than one cleaning cycle which varies in time depending on how dirty the oven is. Whether it is lightly or heavily soiled these clever ovens will clean themselves to look as good as new - fully automatic self cleaning at the touch of a button. There is even a cleaning reminder on some models.

OVENS/

PROCOMBI™ STEAM SINGLE OVENS

A world of culinary possibilities

Professional cooks understand the fusion of steam and heat creates a recipe for success. It's a combination that gives superior results all round, with soft, tender food on the inside, and a crisp, golden finish on the outside. It saves time, too.
This versatile cooking technique is now available with the ProCombi Steam Oven - in a full size or compact model - so you can achieve perfect results at home.The ProCombi Steam Oven is also a multifunction oven - giving you every culinary tool you need to elevate domestic cooking to new heights.

Combining steam with hot air

The ProCombi Steam Oven uses a combination of steam (25% or 50%) and hot air to enhance flavours, alluring aromas and spectacular textures. The main programmes are described below.

Quarter steam + heat

25% steam and 75% hot air are combined to create irresistible flavours. Food is golden brown on the outside and succulent on the inside so it doesn't only look good, it also tastes delicious. Perfect for cooking bread, poultry, gratins, lasagne and other pasta-baked dishes.

Half steam + heat

Cooks using a combination of 50% steam and 50% hot air. Introducing a higher level of steam into your cooking helps conserve the texture and humidity of the food. Perfect for cooking soufflés and casseroles. Also recommended for reheating dishes as the steam prevents food from drying out.

Full steam

Uses pure -100% - steam. Steam's gentle heat evenly penetrates food making for tasty, healthy dishes. The food retains a higher level of nutrients, vitamins and minerals, compared to other cooking methods, while natural colours, flavours and textures are enhanced. It's a convenient way to cook too, as several dishes requiring different cooking times can be placed in the oven at once without smells and tastes being transferred between foods. Perfect for cooking fish, rice, vegetables and fruit.

The complete professional cooking tool

As well as combining steam and heat you will also have the additional cooking functions found on our multifunction ovens. This ProCombi oven not only steams and bakes but allows you to slow cook, bake and grill in the usual way. Elevate conventionally baked and roasted dishes to new culinary heights with our unique air flow technology, ThermiC° hot air system. Evenly cooked perfection in every corner.

Steam cleaning programme

A special preset programme helps you to remove food residue inside the oven for effortless cleaning. Without the need for special products, simply wipe out after the programme ends.

COMPACT RANGE/ MICROWAVES

Combine a Neue Kollektion
microwave with your traditional oven for the definitive answer to your cooking needs. In addition to conventional cooking methods, you can gently heat liquids without using precious hob space, as well as speed up the cooking process by par-cooking dishes or defrosting meat and fish.

Stainless-steel interior finish
For a professional look and feel.

Our Neue Kollektion microwaves feature our SOLO range - microwave only; DUO range - microwave and grill flexibility; and our COMBI range - microwave or grilling combined with fan cooking for fantastic results.

The perfect partner for your oven
Our high-end Neue Kollektion microwave ovens provide a versatile range of cooking solutions in your kitchen. Flexibility is the key. You can microwave, grill, defrost, re-heat or select the convection function. And all this functionality can be used in any combination you desire.

Perfect results with automatic programming
Whether you're defrosting, cooking or grilling your food, our new microwave ovens can be depended upon time after time. They're automatically programmed to deal with a range of different dishes and foods at the touch of a button. Simply select the food type, weight and the microwave does the rest.

Optimal access and ideal cooking capacity
With an expansive 38-litre cavity size inside our top-of-the-range models, you can prepare even large dishes. And it's easy to load and unload heavy plates and trays with the dropdown door.

Quick start control
Enables you to cook for 30 seconds at full power at the touch of a single button, ideal for common tasks such as warming up drinks. Can be pressed up to 5 times continuously for convenience.

All our microwaves are fully built in so no additional building in kits are required. Selected models can be built under counter and all models can be built in column, offering flexibility to fit into your kitchen.

COOKER HOODS/

A masterpiece of precision

A cooker hood has a job to do, but there is no reason why it should not look visually stunning at the same time. Our Neue Kollektion hoods balance glass and stainless steel in precise, sculptural composition, to align perfectly with the rest of the kitchen.

Premium design, with the highest efficiency

In our Neue Kollektion of hoods, advanced features give you the power and control you need for optimum efficiency.

The ActiveHeat Sensor provides progressive power adjustment, so the hood always works precisely hard enough to clear cooking vapours at any given time. **MaxiFlow Technology** with 3-phase motors ensures operation is extremely quiet, while ample power is always available to be called upon when needed. With the **DirekTouch glass touch control** display, instant control is always at your fingertips.

00 dB

Whisper quiet

AEG's powerful hoods make a real difference to your kitchen environment, ensuring that it is a fresher, more peaceful place to cook or relax. Whisper quiet.

LED lighting

Crisp bright illumination, or a gentle glow? Dimmer-controlled LED lighting means you can adjust the effect at the touch of a fingertip. Being highly efficient, LED lights save energy too.

000 M³/HR

Extraction rates

This is the level at which the cooker hood clears cooking vapours from the kitchen environment. Operation is measured in cubic metres per hour and are in accordance with IEC standards.

Recirculation mode

Where extraction mode isn't practical, our hoods can draw in cooking vapours, filter the air and then recirculate the cleaned air. The long-life charcoal filter can be washed in the dishwasher and dried in the oven.

000 M²

Optimise efficiency

To optimise efficiency and performance of the cooker hood it is important to select the correct hood with an appropriate extraction rate for your kitchen environment. To help ensure you select the correct cooker hood we have added an icon to each hood showing the maximum size of the room each one is suitable for.

LAUNDRY/

WASHING MACHINE

L61470BI
Fully integrated washing machine for perfect fabric care.

BUILT-IN

– Advance fuzzy logic senses the size of the wash load and uses the right amount of water and energy whilst delivering the best wash results.
– Wool plus programme helps reduce wool shrinkage by gradually reducing the temperature before the rinse phase.
– Advanced controls with LCD display for programme confirmation and audible signal for programme end.
– A dedicated stain option dispenses stain removing treatment at 40°C making it more effective.
– Easy iron plus programme actively reduces creasing in fabrics for shorter ironing times.
– Take control of your washing, with our super quick option, which allows you to reduce the wash cycle time depending on how clean your clothes are.
– Our specially designed refresh programme, for up to 3kg of clothing at 30°C in just 30 minutes.

* 20%more energy efficient compared to the limit of energy class A+ machine.

Please refer to page 31 for installation diagram.
TOTAL €839

WASHER DRYER

L61470WDBI
Fully integrated washer dryer for a complete wash to dry solution.

BUILT-IN

– Flexible programming to choose between washing and total wash to dry solution.
– Advanced controls with LCD display for programme confirmation and audible signal for programme end.
– Dedicated wash programmes for different fabric types including delicates and handwash for total fabric care. Together with advanced fuzzy logic the perfect wash and rinse results are delivered regardless of the wash load size.
– Our specially designed refresh programme, for up to 3kg of clothing at 30°C in just 30 minutes.
– A dedicated stain option dispenses stain removing treatment at 40°C making it more effective.
– Extra rinse option for sensitive skin, for effective removal of residual soap suds.
– Built-in tumble dryer with two drying programmes for different fabric types to ensure perfect drying result providing total fabric care.
– Take control of your washing, with our super quick option, which allows you to reduce the wash cycle time depending on how clean your clothes are.

Please refer to page 31 for installation diagram.
